

# Our Future...

*We're on the right track, but Community Support is Vital to our Success!*

<b>Total Project Costs:</b>	<b>\$1,400,000</b>
<b>Current Funding Resources:</b>	<b>\$624,000</b>
<b>Pending Grant Resources:</b>	<b>\$276,000</b>
<b>Campaign Fundraising Goal:</b>	<b>\$500,000 (CT Scanner)</b>

\*Note\* (All Grant resources are contingent on community support.)

## We're on the right track, but community support is vital to our success!

Virtually every family in Sweet Grass County is affected by the quality of care and scope of services available through our hospital. On average, one in four individuals will require medical services during the next year.

With our aging population, this ratio will likely increase. The quality of local healthcare will affect everyone in your family eventually. Whether it's a minor injury or life-threatening trauma, now is the time to improve access to the best possible medical care available for our loved ones.

## How you can help...

You can help by assisting our *Sharing the Gift of Health Campaign* efforts with a donation. Donations can be made through cash or planned giving; such as, life insurance policies, stocks, bonds, estate planning or a variety of other endowment tax relief opportunities.

Sweet Grass Health Care Foundation is in dire need of \$500,000 to help match grants. Together, we can do this one phase at a time.

Donations will go to the purchase of a new CT Scanner. Additional funding will be sought to match community support with private grants that include a new Ambulance Station, ongoing hospital construction and updated equipment needs.

## Why participate?

- To save lives!
- Originally formed in the 1950's, the Hospital has been the cornerstone for "Neighbors helping Neighbors".
- Rural Hospitals struggle on a National Level and rely on community support to provide lifesaving care for your family, neighbors and friends.

# Through your generosity, we will be able to...

## ... Save Lives!

- Identify Strokes and TIAs
- Diagnose Head and Spine Injuries
- Lung and Liver Diseases
- Cancer
- Tumors
- Blood Clots
- Internal Bleeding
- Broken Bones
- Monitor a variety of other diseases and conditions
- Enhance collaboration with other hospital departments
- Be an enormous boost to our local economy and reap sustainable, future economic benefit for Pioneer Medical Center

CT Scans assist providers in narrowing down the causes of a patient's symptoms without surgery and can diagnose an illness before symptoms appear.

CT Scans have the power to change a patient's life by acquiring information in seconds rather than minutes and reducing a provider's response time in making a diagnosis.

Rural Hospitals have been utilizing Tele-medicine since the 1980's. A patient's diagnostic images are sent to larger facilities to assure stabilizing prior to transporting.

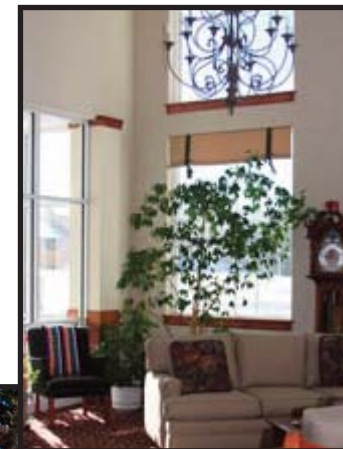

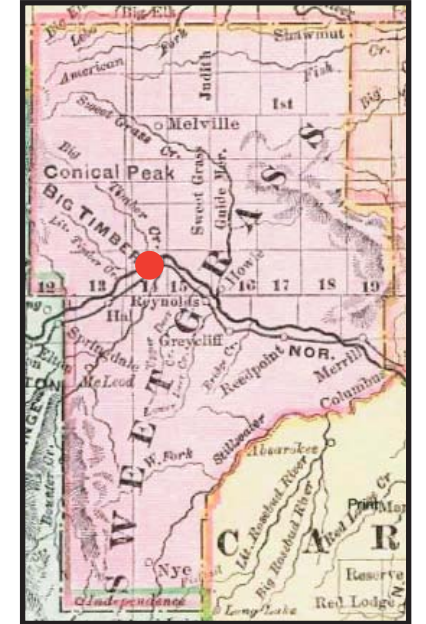

Administering lifesaving medications can be the difference between living, dying and positively affecting a patient's quality of life.

# Who will benefit from your generosity...

## Pioneer Medical Center's Service Area

- 1,855 square miles
- 3,700 population
- 13,000 annual patient visits

*You're not just a room number here. This is where neighbors are helping neighbors.*
